lake is well known as one of the best fishing places in the province, and the surrounding country as the hunters' paradise. The east end of lake is 7 miles west of Alberni, and there is hotel accommodation. At the west end is Clitsea Mountain, at foot of which is a lodge for hunters and fishers. Taylor River empties into the lake at this point. Gasoline launches, row boats and tents can be secured at either end. Kahloka is at the west end of the Island Highway, and is as far west as it is possible to motor in Canada.

STEPHEN

a station on C.P.R. main line, on Alberta boundary. Has C.P. telegraph office. Stephen is near the top of Kicking Horse grade; a small lake in front of the station is "the head" of the Kicking Horse River. A small stream called Cataract Creek enters the lake at the east end. Cataract Valley is one of the most beautiful valleys in British Columbia, at the very summit of the Rockies, and leads to Lake O'Haro, 7 miles south of Hector, and Lake McArthur, 12 miles, reached by pony trail. Ponies and guides for this trip may be had from Brewster Transport Co, Field or Lake Louise. A great many tourists visit these lakes each summer. It is at Lake O'Haro that the Alpine Club of Canada have their permannet camp, where mattresses, stoves and dishes are available to visitors. The famous Spiral tunnels, in which trains make a complete turn inside of Mt. Cathedral and again in Mt. Ogden, are just 3 miles west of Hector. Address mail via Field P.O.

SUMAS JUNCTION

a junction on C.N.R., 5 miles west of Chilliwack, near Sardis, in Chilliwack Prov. Elec. Dist. No residents.

SUMAS MUNICIPALITY

area 46 square miles, principally a dairying and cattle district, with some berry ranches. A dyking project for reclamation of 30,000 acres is under way by Provincial Government. Possesses the best and most extensive fire-clay deposits on the Pacific Coast, operated by the Kilgard Mfg. Co. and Clayburn Co., manufacturers of fire-brick, etc. Population, 600. Post offices, Huntingdon and Abbotsford.

Municipal Council

Fred Fooks, Reeve
Thos J DeLair, E E Austin, J L Atkinson, C A Lamson, Councillors
C St George Yardwood, Clerk, Huntingdon
School Board—Thos B Straiton, Wm Porter, E E McPhail, W L Blatchford, E E Austin
Police Commissioners—Angus Campbell, Wm Porter, C St Geo Yarwood, Clerk Corporation of the District of Sumas

Summerland

a P.O. and town on Okanagan Lake, 7 miles from Penticton, 55 miles from Okanagan Landing, and 1 mile from West Summerland, on the C.P.R. Kettle Valley line, in So. Okanagan Prov. Elec. Dist. It is the nearest town in Okanagan Valley to the coast, with daily train service over the Kettle Valley Ry., and owns its electric light, irrigation and domestic water plants. The telephone system, which is a very fine one, is owned by a local company. It has Dom. Govt. and C.P.R. telegraph offices, daily steamer and express service, Anglican, Union and R.C. churches, and consolidated schools. The rural municipality of Summerland comprises about 28 square miles, and is a large producer of soft fruits and vegetables seeking an early market, and apples. The Experimental Farm is situated at the southern boundary. Mixed farming can be carried on successfully a few miles back, while lumbering is now being carried on largely for the production of box shooks. The climate is excellent—dry, clear and sunny. Good fishing and shooting. Population, 1,800. See also West Summerland.

URLING

a station on the G.T.P.R., 44 miles west of McBride and 8 west of Loos, the P.O., in Fort George Prov. Elec. Dist. Section crew only.

Dolly T section foreman

USK

a P.O. and town on the G.T.P.R., 107 miles east of Prince Rupert and on the Skeena River, in Prince Rupert Prov. Elec. Dist. It is the distributing point for an extensive mining and prospecting district. Has Govt. telegraph, office of Sub-Recorder Omineca Mining Division, Anglican church, public school and Govt. ferry. Local resources: Mining and timber. Population, 200.

The Usk District lies in the Cordillerian Belt, the same mineral belt as Southeastern Alaska, Portland Canal, Granby and Alice Arm, with similar characteristics of mineral deposition. This indicates a future field of great potentiality.

The district immediately surrounding Usk has well-defined geological areas of certain individual minerals. At this point along a great fractured zone, granodiorites, diorites and porphyries have intruded the sediments and given rise to intensive mineralization, in which gold predominates, copper in the dioritic rocks is associated, and in the granodiorites the gold has silver associated in arsenical pyrites. Close to Usk are "Lucky Luke," "Emma," "4 Ace," "Old Hickory," "Tulon" and "Continental" groups of mineral claims.

At a point further east—18 miles—a belt of andesite, intricately fissured by porphyries, greenstone and trachytes, exists, where copper predominates, carrying a small quantity of gold, with large percentage of silver in the grey copper ores. Chalcocite is in excess of the bornite or chalcopyrite. The ore exists in dykes and replacements in the fissured zones. In this area there are located 50 mineral claims, the principal groups being "Wells," "Peerless," "Lowrie," "Montana," "Copper King," "Northwest" and "Large."

The Kitselas Mountain Copper Co., Ltd., operating the Cordillera group, have installed a milling plant with a capacity of 30 tons per day. The property is situated one mile below Usk and about 1,000 feet from the railway track, and has access to station by wagon road.

Kleanza Company, Ltd., incorporated to operate general mining, milling and power, are at present developing the "Golden Crown," "Kleanza" and "Valhalla" groups of mineral claims, situated on Kleanza Mountain, 3 miles southeast of Usk, and connected by wagon road and the Skeena River, which is crossed by Govt. ferry. A dam at the first canyon of Kleanza River is being built for the purpose of hydro-electric generation to run the mining and milling plants. The sawmill in this connection has a capacity of 25,000 feet per day.

The forest around Usk District is prolific in its timber resources. There are 3 sawmills now operating and another is in course of erection.

Vancouver

Vancouver is situated on the Gulf of Georgia and on the north arm of the Fraser River. It was incorporated in 1886, but was almost completely destroyed by fire in the same year, so that the city is actually only 34 years old. In that time it has become the fourth city of Canada, an industrial centre and an important railway terminus. This is the result of the development of Vancouver's natural resources, a more general knowledge abroad of the city's attractions, and the increased transportation facilities by land and water.

Vancouver is Canada's most important Pacific port. It commands the Western Canadian route to Russia, the Orient, Australia and New Zealand. It is in immediate touch with the grain fields of Western Canada and, via the Panama Canal, affords the shortest route for shipments to Europe, South America and Mexico. In addition, it possesses one of the finest natural harbors in the world—open for shipping throughout the year—having more than 28 miles of waterfrontage and over 20 miles of deep water anchorage.

The equipment of the harbor for handling shipping of all kinds is being steadily increased. It has been announced that the Dominion Government is going to spend $5,000,000 in Vancouver in the near future on harbor development, consequently we will be in a better position to handle national traffic. The C. P. R. is now building a pier of concrete and steel, double-decked and equipped with all modern freight handling devices, which will cost between two and three million dollars when completed. Within recent years the Dominion Government has built one of the best equipped wharves on the Pacific Coast and erected a terminal grain elevator. Shipping is consequently increasing and since the war is over and as conditions become normal, the amount of tonnage entering the port will no doubt be doubled.

Vancouver is the western terminus of the C. P. and the C. N. Rys, as well as the G. N. and N. P. The C. M. and St. P., the U. P., the K. V. and P. G. E. railways also operate here.

Vancouver is served by many steamship lines and is a large export point. The Canadian National railways intend to provide steamship service to the Orient and Australia, similar to that of the C. P. R. The Pacific SS Co plans to enlarge its service in order to undertake more extensive Oriental trade and to include transpacific passenger traffic.

Vancouver proves her right to be called the commercial centre of B. C., for a glance at the business statistics during the past year exemplifies this. The bank clearings, customs returns, building permits, postal returns and the essay office returns for 1919 aggregate a total of $681,065,180.87, which is $120,837,381.87 more than for 1918.

Of the 53 banks in Vancouver, $120,544,487.00 is the increase in their clearings for 1919 over 1918. There are 350 firms in the city, with an annual payroll of approximately $12,000,000. One of our largest industries is shipbuilding which, during the war employed about 5,000

Mr. Motor Truck Buyer

Three vital points that should be thoroughly investigated before you purchase any motor truck:

1. QUALITY—The quality of parts used in construction and the manner of assembling.

Giant Trucks are built by specialists with twenty-four years of manufacturing experience, using Red Seal Continental Motors, Timken Axles, Timken Worm Drives, Timken Bearings and Spicer Universal Joints.

2. ECONOMY—Cost of fuel and operating expense.

Giant Trucks have an exclusive feature — the Duntley Generator. This generator superheats the fuel and thermo syphons steam into the cylinders, permitting use of either kerosene, distillate or gasoline, resulting in a saving in operating costs of fully fifty per cent.

3. SERVICE.

Giant Motor Truck Company, Vancouver, is a direct representative of the $16,000,000 factory, carrying an immese stock of repair parts. Every Giant Truck is guaranteed for one year from date of purchase, and all service and replacement of defective parts for that period are free.

Early Springtime, Shaughnessy Heights, Vancouver.

men, and on which many millions of dollars were spent in ship construction. About 2,700 men are now employed in the shipyards and this work will continue for many months yet.

Other industries employing thousands of people include lumbering, mining, fishing, foundries, sugar refineries, flour milling, printing and publishing, food products, clothing, paper and pulp, and wholesales. Among the factories which are building here this year are, a tire and rubber plant, glass factory, brick factory, two wire rope factories, automobile accessory plant and further development is anticipated within the next few months. Vancouver is making rapid strides toward becoming a city of factories.

A large area of reclaimed land—Granville Island, a few blocks from the retail business district of Vancouver—is providing excellent sites for many industries. These sites are served with trackage, wharfage, electric power, water, lighting, gas and sewers. They may be leased for 66 years at rates varying from $500 to $1,500 per acre per year. Other sites equally as desirable may be secured on Burrard Inlet and in the suburbs.

The City of Vanvouver exempts from taxation the machinery of factories and levies a rate of 50 per cent. of the assessed value of improvements. Some of the suburban municipalities levy no tax whatever on improvements, merely on the value of the land.

There are many opportunities in Vancouver for manufacturers along special lines, such as mineral smelters and refineries, lumber and pesh products, woollen mills, rubber factory, machinery, clothing, chemicals and canneries. Iron, coal and other minerals, building material and timber are available in large quantities and a great many of the raw materials from other parts of the Province and from all the countries bordering on the Pacific, can be brought in very cheaply by boat; also, raw materials and partly manufactured goods from the Atlantic, via the Panama Canal. For a number of raw materials, no point in Canada is so favorably situated as Vancouver.

Within a few miles of the city, 100,000 horsepower may be generated from waterfalls; 200,000 horsepower is now available as electrical energy. In addition to the power already developed, there are many locations in the districts surrounding Vancouver where factories may develop their own electric power right at the source of their raw materials.

The city controls its water system, which is supplied from mountain streams. The present daily supply is 36,000,000 gallons, with an additional 40,000,000 gallons in the city reservoir and a total of 100,000,000 gallons available. The water of Vancouver is almost chemically pure and this fact is of great advantage to a number of manufacturers. Further, the city gives a very low rate to manufacturers.

Vancouver is gradually becoming a Mecca of tourists, for the climate is without extremes either of heat or cold, and is as temperate as that of England. This moderate temperature is caused chiefly by the protecting mountains, together with the breezes blowing from the ocean and warmed by the Japan Current. So uniform is the general temperature that outdoor work can be carried on the year round. Blizzards are unknown as they are dellected to the country east of the Rockies. In summer our weather is almost ideal as the temperature rarely rises above 90 degrees, with a breeze generally stirring and with cool refreshing nights.

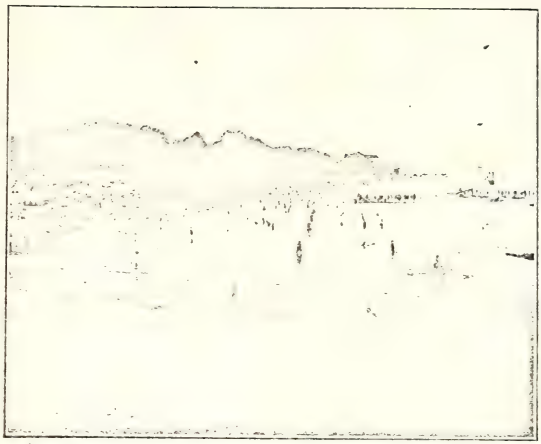
VANCOUVER



Summer Time, English Bay, Vancouver.

The population of Greater Vancouver is 195,000; without the suburbs, 123,950. Vancouver has 61 miles of paved streets, 211 miles of concrete walks, 196 miles of sewers and 318 miles of water mains. It is served with 109 miles of street car tracks and these connect with 156 miles of interurban railway.

Every phase of community life finds in Vancouver its best expression. We are justly proud of our churches and schools, the latter being modern in every respect, with the best obtainable staffs of teachers. The Provincial Normal School and the University of British Columbia are two of the city's great educational institutions.

Vancouver is well policed and has one of the best fire brigades in America. It is one of the healthiest cities on the continent, the death rate per thousand of the population being less than half that of many Eastern Canadian and American cities.

The City of Vancouver has received a full share of scenic as well as climatic blessings. Within an easy walking distance from the centre of the city is Stanley Park —a natural park of a thousand acres, world-famed for its large trees and containing many points of interest—the zoo, Siwash Rock, Shakespeare's gardens, Pauline Johnson's grave, the Seven Sisters, etc. A splendid motor road nine miles in length encircles the park and some fifty miles of trails offer opportunity for delightful rambling. During the summer months, band concerts are given every Sunday in this park.

At different points throughout the city are twenty-three smaller parks, containing tennis courts, ballgrounds and gardens. From one of these parks, Little Mountain, one can obtain a splendid panoramic view of the city and the low-lying lands of the Fraser Valley.

Right in the heart of the city, too, are splendid bathing beaches, which are the daily resort of thousands of people in the summer time. An open air vaudeville performance is given at English Bay during the summer months.

Radiating from the centre of the city are many splendid motor drives—Marine Drive, twenty miles in length passes along the shore line of the Gulf of Georgia, English Bay and through the suburbs of Point Grey, North Vancouver and West Vancouver. Marine Drive, part of the Georgian circuit, is also a link of the Pacific Highway and this gives a continuous automobile road direct to San Francisco.

Across the Inlet, within easy access of North Vancouver, are Lynn and Seymour creeks and Capilano Canyon. These mountain rivers, unsurpassed in beauty and grandeur, are the source of Vancouver's water supply. At one or two points, suspension bridges have been built across the roaring waters. One of these bridges is 450 feet in length and 200 feet in height. Gardens containing flowers and plants brought from mountainous districts the world over, are to be seen here.

For cruising, the land-locked waters of Howe Sound and Burrard Inlet offer many advantages. Within a few hours' ride from Vancouver are the summer resorts of Bowen Island, Wigwam Inn, Horseshoe Bay, Squamish, Sechelt, etc. During the summer months, steamers run daily to these points and many special excursion trips are also given.

It is proposed to construct a hydroplane hangar in Vancouver this year and special flying trips will be made in the Bay and to Bowen Island, Indian River and other points.

In the way of recreation Vancouver is well provided. Golf, football, hockey, and bowling, are enjoyed

every day in the year. A splendid rink of artificial ice provides much enjoyment and hockey matches take place here every week during the skating season. In addition to our many theatres; three large playhouses are under the course of construction and these will provide much diversity of entertainment. It is proposed to build indoor salt water swimming baths this fall.

Vancouver is not only a commercial and industrial centre, but a desirable residential city as well. In the past it has established a record for commercial and industrial growth and in the future greater prosperity and advancement will attend this metropolis of British Columbia.

J. R. DAVISON,
Publicity Commissioner.

VANCOUVER

Manufacturers' Association of British Columbia, Inc.

J. H. Falconer, President
A. B. Weeks, Vice-President
E. G. Baynes, Hon. Treasurer
James Hart, Secretary

Jas. Ramsay, Hon. President

Vice-Presidents
F. T. King, Vancouver
Nels Nelson, New Westminster

The object of the Association is to further the interests of manufacturers and industries in British Columbia in all respects, and the record of the Association stands as a proof of its utility.

The persistent efforts of the Association in the direction of securing better recognition of the products of local industries have been met with considerable success, and to-day it stands as an accepted rule with regard to government, municipal, and other public work of any kind, that British Columbia material shall be given preferential treatment, and the majority of tenders call for local material if obtainable.

The Association has been the means of securing a large amount of work for British Columbia manufacturers, which would otherwise have been sent out of the province by private interests, and has spent large sums and effort in educating the public in general to give preference to the products of the industries of their own province. It is estimated that the Association has been the means of procuring for and retaining within the province contracts, government orders, etc., to the extent of twenty-five million dollars, and was instrumental in inaugurating the shipbuilding industry.

Active committees deal with matters of freight, tariff and kindred subjects of importance to industry, and all matters of individual or collective interest to manufacturers.

The executive expenses are small, the services of members acting on the executive being rendered gratis.

Every manufacturer in the province not claiming membership in this Association is acting detrimentally to his own interest and is a source of weakness to the other provincial industries. The Association therefore urges every provincial manufacturer to become a member, which will be to his benefit and assist the co-operative effort for the benefit of the province as a whole.

Further information as to membership fees, etc., may be obtained from

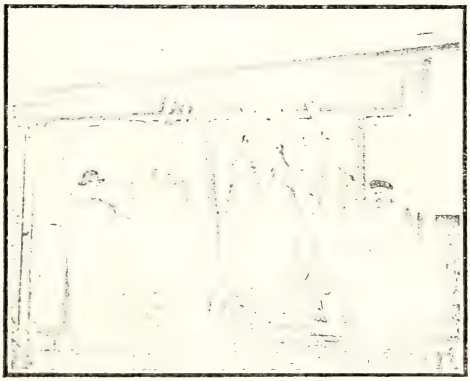
FISHING — HUNTING — SHOOTING

IN THE LILLOOET DISTRICT SERVED BY

The Pacific Great Eastern Railway



One hundred and sixty miles north of Vancouver, is one of the best big-game preserves in British Columbia. Grizzly bear, cougar, mountain sheep and goat abound in the hills and mountains.

The known haunts of most of these animals are within twenty miles of Lillooet town and extend for many miles in all directions.

This country offers the hunter and sportsman possibilities of the greatest interest and a variety unequalled.

Experienced guides and complete outfits are available.

Excellent accommodation. A descriptive illustrated folder and time-table mailed on application to Passenger Department.

Finest Transfer Equipment in Vancouver

HOUSEHOLD FURNITURE

MOVED—PACKED—SHIPPED—STORED

MOVING—in padded "Car-Vans"—auto and horse-drawn.
PACKING—for storage or shipment by experts using only clean, new sanitary materials.
SHIPPING—to any point by our "Pool-Car" System, saves the shipper from 25 to 40 per cent. in freight charges.
STORAGE—We have the finest storage warehouses in Canada—Fireproof—Private Locked Compartments—"Silver Vaults"—"Safety Deposit Boxes"—"Piano Room"—"Special Trunk Sections", etc.

Every facility for the proper handling of carload shipments (or less) for Storage, Cartage, Forwarding or Distributing

"Outdoor life all year round in Vancouver"

THE GROSVENOR is the most popular residential hotel in Vancouver—Canada's fourth city. It is situated on Howe Street, one block west of Granville—the elite shopping and theatre section. It is two minutes from the heart of the beautiful West End, and five minutes from Stanley Park, English Bay and the beaches.

One hundred and eighty-five—all outside rooms—all pleasant, comfortably and tastefully furnished. The ladies' parlors and public rooms suggest comfort and refinement.

Tourists and travellers are invited to inspect the hotel. If you are not satisfied we will drive you to any other hotel in the city without expense.

EUROPEAN PLAN

$1 and $1.50 with use of bath $2.50 and up with private bath

VANCOUVER

GURNEY-OXFORD

THE PROPER WAY to estimate the value of your range is to divide the present purchase price by the years of service usually given by a "Gurney-Oxford" Range, and the result will be less than the cost of one sack of flour per year.

The high standard of the "Gurney-Oxford" Ranges is recognized throughout the Dominion.

Write us for a catalogue and prices, which will be sent at once and without any obligation.

OFFICE & SPECIALTY
FILING SYSTEMS

Increase Office Efficiency

Even from your most capable and loyal clerks you do not get really efficient work if your office systems are poorly organized. Their time—your money—is wasted in useless and unnecessary effort. When you stop to think of it, you can't help realizing the importance of having the work of your office force efficiently organized.

"Office Specialty" Filing Systems have been developed during 30 odd years' study of office systems and filing problems in every kind of business. They are designed to enable clerical workers to do more and better work in less time. Their keynote is efficiency with simplicity. All unnecessary work is eliminated and every system must supply the desired information with a minimum amount of effort.

It will be worth your while to call on our System Experts at the Vancouver Service Store. They will gladly assist you in solving your office problems.

When thinking of Furniture—think of "STANDARD"

Each piece of furniture we sell—whether it be the most moderate priced or the most expensive, must satisfy two groups of people—ourselves and our customers; each piece must justify its reputation and the faith that has been placed in it.

Each must be worthy of the Standard tradition.

We are showing a very comprehensive collection of low priced, moderate priced and high priced pieces just now, each of our five floors has its full quota of offerings, and it will surely be to your satisfaction to pay this store a visit.

When thinking of Furniture—think of Standard, then, you will have assured satisfaction, and our guarantee behind it—this is your safeguard.

You are cordially invited.

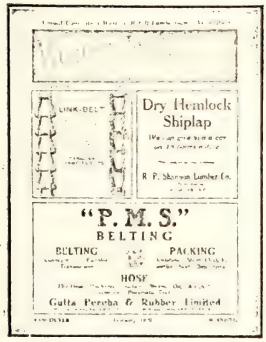
Purchasing Sense



How much thought do you give to "what you are buying" when you purchase advertising space in any publication? You know it is circulation, but as to its quality and quantity you perhaps give little concern. Would you buy an automobile that way?

Western Lumberman

When you buy advertising space in this medium you get maximum value for your dollars. Representing the lumber industry of Western Canada for sixteen years its standing as a leader and not a follower has never been disputed.

WESTERN LUMBERMAN

VANCOUVER HEIGHTS

a suburb of Vancouver. See listings under Vancouver.

Vanderhoof

a P. O., is the logical centre of the Nechako Valley, the largest area of agricultural land in British Columbia and the geographical centre of the Province. The valley of the Nechako is from twenty to forty miles in breadth and extends from Prince George west to Fraser Lake. It contains millions of areas of good arable lands, most of which is in an early stage of development. Land in this fertile valley can be purchased cheaply to-day, but the growing demand for it will raise prices appreciably in the next year. Preemption land may also be had, at from 6 to 12 miles back from the G. T. P. Ry., which traverses the valley from east to west.

Settlement during 1919 has been greater than in any other single preceeding year. This is accounted for by the fact of the Land Settlement Board of British Columbia making available two large areas for Settlement purposes, the coming of many returned soldiers taking up land under the Soldier Settlement Act, and a large immigration of farmers from the prairie provinces. The volume of produce, for which a ready market has been found, is growing greater every year, this year touching the high water mark of export. The principal produce is grain, hay, and vegetables, of which an excellent quality is grown.

The town of Vanderhoof with a population of 300 is located on the south bank of the Nechako River, and is distant from Prince Rupert 398 miles and from Edmonton 557 miles. It is served by the G T P Ry., and is within the Fort George Electoral District. It is the natural distributing point for the following settlements within and near the valley: Fort St. James, and the Omenica, Dog Creek, Chilco, Stuart River, Hulatt, Mapes, Lakes District, Greer Valley and Mud River Valley. The strategic position of the town as-

sures it of a permanent position in the settlement of the valley.

It has telegraph communication for points east and west on G. T. P. Ry. Telegraphs, and also by means of the Government Telegraph Service running from Ashcroft to Dawson, the two lines thus affording an excellent service. A rapidly growing telephone service gives communication with Fort St. James, Fort Fraser, Burns Lake, and to a number of the farms in the district. Plans are under way to instal a general service in the town. Presbyterian, R. C. and Anglican Churches are represented. There is a public school with accommodation for 85 pupils, but a much larger school building is contemplated, also the erection of a high school. Vanderhoof has a resident physician, a weekly paper, and a branch of the Canadian Bank of Commerce. Hotels—there are the Vanderhoof Hotel and Nechako Hotel, European and American plans, rates $2.50 per day and up. Plans are now under consideration for the erection of a Canadian Home for the International Editorial Association, whose American headquarters are at Basic, Virginia.

Vanderhoof has the finest roads in the northern interior, and is the centre and outfitting point for fishing and hunting expeditions. The rivers and lakes in the vicinity teem with fish, and big game hunting can be had in the close neighborhood. Climate is healthful and bracing. Altitude 2,200 feet. The scenery around Vanderhoof is superb, and the numerous lakes in the vicinity afford bathing and boating facilities for visitors. The Provincial Government intend erecting a creamery at Vanderhoof.

Vernon

the centre of the largest fruit growing and farming locality in British Columbia, was incorporated in 1898, and occupies a central position in the Okanagan Valley, being virtually the terminus of the Okanagan rail line of the C.P.R., 46 miles south of Sicamous, on the main line, and connecting through Okanagan Landing, 4 miles south, with the Okanagan Lake points in Southern Okanagan, and is 382 miles east of Vancouver. It has the offices of Provincial Government Agent; Assistant Horticulturist, Provincial Agriculture Department; Land Commissioner, Osoyoos Land Recording District; Provincial Police Chief Constable; Gold Commis-

sioner, Vernon Mining Division; Sub-recorder Greenwood and Arrow Lakes Mining Division; Agent Dominion Department of Indian Affairs, Okanagan District; Deputy Collector Inland Revenue (Canada); Sub-Collector of Customs, out port of Revelstoke; and District Registrar of the Supreme and County Courts. The city enjoys all modern conveniences. Has Anglican, Presbyterian, Methodist and R. C. churches, public and high schools, C.P.R. and Govt. telegraphs. Fruit growing, packing, canning and evaporating are the principal industries. It is the largest city in and the distributing point for the Okanagan district.

As regards marketing and shipping facilities Vernon is exceptionally well favored. The district is served at present by the C.P.R., which connects it with the Prairie Provinces which afford a ready market for agricultural products of all kinds. Owing to the great increase in production, the Canadian National Railways are now building through the district, connecting up with the main line at Kamloops; this will again expand the already large market for local products. Vernon and district are well served as regards shipping concerns. Several important fruit and produce shipping houses have their headquarters in this city, and in Vernon is also centred the selling agency which handles the output of the various co-operative organizations of the valley.

A feature of the year's activities of the co-operative organization has been the formation of a subsidiary storage company among its members, and the mammoth frostproof warehouse is now completed. It is the largest building of the kind in the West, being 400 by 80 feet in size, with a frostproof basement and first storey capable of storing about 250 cars of apples.

Mixed farming is very profitable in the Okanagan, and in the Vernon district a large acreage of suitable lands is available for this purpose. On the north side of Vernon the Land and Agricultural Co. of Canada have an estate of 17,000 acres. The soil is the very best. Eight thousand acres of this are irrigated, 600 acres in orchard, 9,000 acres of range land, and 800 acres in hay, mostly alfalfa The company have at the present time 1,000 head of cattle. The land is operated to show results that can be obtained and settlers will have the advantage of this experience.

It is a well established fact that stock ranching in the Okanagan and adjacent valleys is considered one of the most profitable undertakings, as frequently all classes of stock can feed on the open range from March till December.

The climate is admirably suited for outside feeding through the few winter weeks that feeding is necessary.

The exports of fruit and vegetables from the Okanagan for 1919 have by far beaten all previous records. From figures carefully compiled by R. M. Winslow, secretary of the B. C. Credits and Traffic Association the section between Enderby and Penticton inclusive, and taking in Summerland, Peachland, Kelowna, Okanagan Centre and other points on Okanagan Lake, Oyama, Vernon, Coldstream, Lumby, Armstrong and Enderby districts the total value of fruit and vegetables marketed this year reaches the magnificent sum of $5,294,250. When the exports of hay, grain, cattle, hogs, and poultry are added to this it will easily bring the total of the valley's production well over the six million dollar mark. Taking the population of the Okanagan at 20,000 this means $300 per head for every man, woman and child in the district.

The Department of Agriculture of British Columbia have established here a branch, whose officers are always at the service of the grower to give assistance with advice regarding cultural methods, control of pests, and other problems with which the grower may have to contend in the growing of agricultural and horticultural products. This service also is effective in curtailing and controlling orchard pests, thus insuring perfect fruit.

The Vernon district offers great attractions to the hunter and fisherman. There is an abundance of feathered game, including many varieties of grouse, prairie chickens, ducks, geese, partridges, etc., within easy access of Vernon. The more mountainous districts offer various species of large game, among which are deer, caribou, moose, mountain goat, bear and mountain lion.

In both Kalamalka and Okanagan Lakes trout and other fish abound, and in the mountain streams and lakes the speckled beauties give the angler every opportunity to indulge in this pleasant and healthy pastime.

Population, 4,300.

Victoria

Victoria has the distinction of being the oldest community on the Northern Pacific Coast of this continent. Its history properly begins with the arrival of the steamship Beaver at Camosun Bay on the 13th of March, 1843, for the Hudson's Bay Co. had decided to move its principal station from Fort Vancouver on the Columbia to Vancouver Island on account of the difficulties arising out of the international boundary question. The expedition to establish the new headquarters was headed by Factor (later Sir James) Douglas.

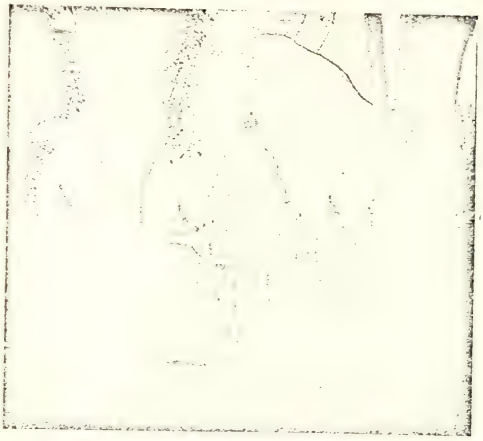
After the settlement of the boundary dispute merchantmen and war vessels commenced to call at Victoria to replenish their stores. Here, too, came the miners of '49 on their way to and from the gold fields of California to make purchases in exchange for their gold dust, for the Hudson's Bay Co. had a much better organized service than any to be found along the American sea coast.

It was after the appointment of Sir James Douglas to the post of governor of Vancouver Island that the political and legislative history of Victoria began. In 1858 gold was discovered on the Fraser and Thompson Rivers. This period is marked by what is familiarly known as the Cariboo strike. At that time Victoria had a population of 5,000, and in 1862 the city was incorporated.

With the gold rush of 1898 to the Klondike, Victoria, in common with all of the cities on the Pacific seaboard from San Francisco to Prince Rupert, received a new trade impetus. About this time, too, tourist travel began to include Victoria in its itinerary, as the C. P. R., realizing the future possibilities of Vancouver Island, inaugurated a new steamship service between the cities of B. C. and Puget Sound ports, and established a chain of palatial hotels from the east of Canada to the west. Until 1914 when the war broke out Victoria came more and more into prominence as a commercial and residential city, an ocean port and a tourist resort.

In every way it is a modern city. It owns its own waterworks system, that of Sooke Lake furnishing a supply sufficient for a population of 500,000.

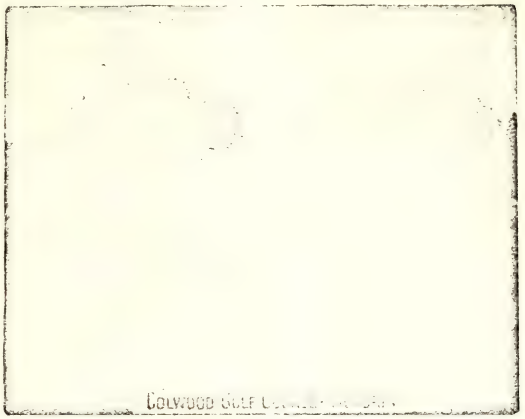
Victoria has 47 miles of paved streets; 120 miles of sidewalks and 60 miles of boulevards. It owns its own sewerage system, which cost over $2,000,000 to instal. It has a population of 60,000. Its area is 4,637 acres, and the municipal assessment is $56,694,922 on land, and $26,196,630 on buildings.



Parliament Buildings, Victoria.

Scores of the most modern offices and other business buildings have been erected; there are hundreds of beautiful homes; the entire downtown business district has been fitted with ornamental light standards; there is a very efficient street car service, operated by the B. C. Electric Railway Co., which also controls the domestic electric lighting and supplies power to factories. The ample supply of good water, the excellent system of sewerage, surface drains, street-cleaning, garbage collecting and disposal is reflected in the citizens' general good health and low death rate.

During the war period Victoria contributed over $8,000 men for overseas service, and $400,000 to the patriotic fund, and $650,000 to the Red Cross, as well as oversubscrib-



ing by 50 per cent. to both of the Victory loans. She contributed largely to the manufacture of munitions and war materials, among which latter must be mentioned the aeroplane spruce which came from timber districts adjacent to the city, and which assisted so largely in establishing British air supremacy.

During the war and for the year following the cessation of hostilities ship-building was engaged in on a large scale. Three shipyards were in operation on the waters of the Inner Harbour, formerly the Songhees Reserve and now owned by the B. C. Government. This tract of land is to be utilized for industrial sites and railway terminals. The Harbour Marine Yards have a contract to build steel ships for the Dominion Government, several of which are nearly completed. The Foundation Co and the Cholberg Company until recently filling orders for the French Government and Norwegian owners respectively, soon expect to renew operations on a large scale. Besides these three there are the large ship-repairing plants of Yarrows Ltd. and the Victoria Machinery Depot, as well as the local firm of Hutcheson Bros, which manufacture metals, fittings and engines for ships.

On account of the fact that there are such large quantities of magnetic iron ore to be found on the Island and in British Columbia it is the hope and expectation of those interested in the manufacture of these ores to establish a steel plant in the vicinity of Victoria.

Efforts are also being made to encourage sheep-raising on the Island, as this form of farming has been found to bring splendid returns. It is the object in this connection to establish a woollen mill here, and manufacture cloth and blankets as well as yarns

Building operations interrupted by the war have been resumed. With the return of the men from overseas, normal conditions are becoming established; there is a demand for homes and farm lands, and great increase in all lines of commercial activity. A branch of the Aerial League of Canada has been established here. Flights have been made from Victoria to different cities on the Georgian circuit, and the development of an aerial mail and passenger service between Victoria Island and the mainland is looked forward to in the near future.

One of Victoria's chief attractions and perhaps her best advertisement from a climatic point of view is the Dominion Government Observatory, situated on Little Saanich Mountain. Victoria was chosen from among all other cities in the Dominion of Canada as the one which possessed the best "seeing" atmosphere, freest from fog, and the most equable climate. The observatory which houses one of the two largest telescopes in the world, is reached by electric interurban or by motor. It is eight miles from the centre of the city, and a well-paved road winding through part of the beautiful Saanich Peninsula leads to the door. The observatory is open for visitors every day, and every Saturday evening, weather permitting, they have the privilege of observing celestial objects through the great telescope.

The climate of Victoria has often been compared with that of the south of England, but recent statistics gave Victoria more hours of bright sunshine than even the far-famed summer resorts along the English Channel. From May to September is usually a period of small rainfall and bright skies, but the nights, even in midsummer, are invariably cool, and the heat of the day always tempered by the sea breezes. In describing the scenic beauties of Victoria and vicinity, it is difficult to find enough superlatives. Victoria itself has been called a "City of Trees." Airman looking down from aloft tell us that Victoria has the appearance of a great garden. As the steamers reach this port, travellers are also

impressed with this feature. Avenues of trees mark the city streets, and century-old oaks, wide-spreading maples, and tall poplars grace every garden. From April to May the gold of the Scotch broom colors the hillsides, and all the year round, winter as well as summer, this is an evergreen city, for the laurel, the holly, the firs and the cedars do not change their color, and the grass only takes on a deeper tint. The scenic outlook from Victoria itself is unsurpassed. It is surrounded on three sides by the ever-changing tidal waters of the Pacific, and beyond them the green foothills and the towering snow-peaks of the Olympics.

On account of the equableness of the climate, there being no winter in the Eastern Canadian sense of the term, but only a rainy season with light frosts and rare snowfalls, Victoria and the country surrounding are admirably adapted to all kinds of agriculture, to fruit growing, stock and poultry raising. There is an ever-increasing demand from the Prairie cities for berries and small fruits grown in the orchards around Victoria.

Sportsmen and tourists generally find in Victoria the mecca of all their desires. It has been called the gateway to Canada's auto paradise, and the Island Highway certainly leads one through scenes so marvellously varied and lovely as to be beyond description. The Island is rich in game, and all of its lakes and streams contain trout of one kind or another, while the finest salmon on the North American continent is to be had at Campbell River.

The principal resorts reached by short trips by rail, auto or steamer are Oak Bay, Brentwood, Sooke Harbor, Sidney, Shawnigan Lake, Duncan, Cowichan Bay, Cowichan Lake, Chemainus, Qualicum, Cameron Lake, Alberni, Great Central Lake and Campbell River. All of these can be reached within a day by automobile. At Oak Bay, at Brentwood, Colwood and Qualicum are to be found splendid golf links. There is a daily steamer service between Victoria and the islands of the gulf. This water trip is one of the most beautiful in Canada.

Victoria is the first and last port of call for all vessels to or from southern British Columbia and Puget ports by way of the Straits of Juan de Fuca. Its great and increasing importance in relation to trade development on the Pacific, the Orient, and by way of the Panama Canal was recognized by the Dominion Government when they authorized the construction of the breakwater at Ogden Point. This has now been completed as well as two piers, freight sheds, electric crane and a car barge ferry slip at a cost of approximately $3,000,000. When the ferry slip on the Songhee Reserve is finished cars can be loaded at the outer docks and sent by continuous journey to any railway terminal on the continent. At present the car ferry Canora connecting with the C.N.R. makes a daily trip from Patricia Bay to Port Mann, linking up the Island with the mainland. The C.P.R. uses its Esquimalt car ferry slip for transferring cars from the Ogden Point ocean docks to its line.

Within the next few months it is expected that a start will be made on the new drydock at Esquimalt, a mile and a half from Victoria. The site has already been purchased by the Federal Government. This dock will be large enough to accommodate the largest vessels afloat.

The fact that there are tremendous areas of marketable timber, and coal, iron, copper and other mineral deposits in great quantity on Vancouver Island has become known to the world. The Pacific Ocean will be the scene of great commercial development within the next decade. There will be a demand for every commodity that Vancouver Island can produce, especially in the line of timber and

minerals. The awakening of the Orient means enormous Canadian trade expansion. Victoria is Canada's doorway on the Pacific Coast. This significant fact will not be overlooked. Already it is appreciated. The population of Victoria is growing rapidly. There is magnificent field here for the investor, the business man and the artisan.

WEST ROBSON

a station on the Boundary branch of C.P.R., and steamer landing at south end of Arrow Lake, 27 miles s.w. of Nelson, in Rossland Prov. Elec. Dist.

See listings under Robson.

WEST SUMMERLAND

a town on the C.P.R. Kettle Valley line, 1 mile from Summerland, on Okanagan Lake, and 10 miles west of Penticton, in So. Okanagan Prov. Elec. Dist. It is the nearest town in Okanagan Valley to the coast, being 12 hours' run from Vancouver. Has daily train service east and west and daily boat service north and south on lake. It is headquarters for District Municipality of Summerland, which owns complete electric light, irrigation and domestic water plants. The citizens own their excellent local telephone system, which connects with all long distance lines. It has Dominion Government and C.P.R. telegraph offices and express service. Has fine churches, high school, and the first consolidated school in B.C. Area of municipality is about 28 square miles. Is one of leading producers in Okanagan Valley of soft fruits, vegetables and especially apples. Ships more express tonnage than any other place in B.C. Has won medals and other prizes at Covent Garden and in the United States in world competition for high-class apples. Dominion experimental farm of excellent character adjoins municipality on the south. Mixed farming can be carried on successfully, but the district is a specialized fruit-growing district. Special courses are provided for newcomers to become expert in fruit-growing. Lumbering is carried on west of the municipality.

Climate is excellent—dry, clear, sunny and mild—making this part of Okanagan Valley called the California of Canada, and very attractive for home-makers. Population of municipality, 2,000. Good fishing, shooting and motoring. See also Summerland. —F. A. C. Wright, secretary Board of Trade.

WEST VANCOUVER

MUNICIPALITY

located on the sunny side of English Bay, at the entrance to Burrard Inlet. West Vancouver municipal ferries furnish direct transportation to and from the City of Vancouver. Other modes of transportation are the P.G. E.R. from North Vancouver; also by auto North Shore Marine Drive. The present terminus of the Pacific Highway ends at Caulfeld, a summer residential site unequalled for its beautiful flowers. West Vancouver has provided for public schools. The Hollyburn school is capable of holding 160 children; the Dundarave school seating 80 pupils, modern in every respect. These are now being supplemented to accommodate the constantly increasing number of children. Marine Drive, the main artery of West Vancouver for road transportation, is built of asphaltic concrete and a favorite drive for motorists. Altmont Park is fitted to become a most popular and serviceable space. Telephone service, operated by the B. C. Telephone Co.; water system, all that could be desired, free from contamination, alkali and lime, now being largely extended, as the population is increasing at the rate of 50 per cent. per annum. Sport and recreation: Fishing, both trolling and rod; tennis, bowling on the green, mountain climbing and boating. Industries at present, lumbering, shingle mills and canneries. The municipality is most desirable for permanent homes and is the most popular summer resort around Greater Vancouver. The southern slope causes early vegetaion. For further information write the Municipal Clerk for description and illustrated folder.

ANSWERS

the following

QUESTIONS

regarding every place in

CANADA

Is it a station? If so, on what railway, and must goods be prepaid? What Express Company reaches the place?

Is it a Post Office as well as a Railway Station?

Is it a Post Office off the line of railway? If so, what is the name of and distance to the nearest station, and can it be reached equally well from more than one station?

What is the name of the Bank there? If no bank, where is the nearest one located?

How far is the nearest place in question from here? How far from some other place?

What time do trains leave from here and what connections can be made? From here or elsewhere?

Is there a Telegraph Office or Customs Office there?

Where is the proper Bonding Warehouse or Customs Port for the place?

If it is a small place, where can legal or insurance documents or financial paper best be sent to be dealt with, or, in other words, where is the nearest "business centre" to the place?

Single Copies, $1.00

Subscription $5.00 per Year obtains a revised copy each month.

R. G. DUN & CO.

Proprietors of

THE MERCANTILE AGENCY

This Company maintains some 225 offices throughout the world for the collection and dissemination of information regarding the financial and credit standing of merchants, manufacturers, traders, bankers, etc.

In British Columbia, offices are conducted at Vancouver and Victoria; other points in the province are visited regularly by representatives sent out by these offices.

At each office a vast amount of information regarding traders is available. In addition to these detailed reports, The Mercantile Agency publishes quarterly reference books containing the names of merchants, etc., with estimated financial and credit ratings, up-to-date lists of banks and bankers, good maps, and summaries of abstract of collection laws, etc., of each province.
